A report gained circulation here last week that a bar was soon to be started in connection with our hotel and that the liquors were already bought. Of course we did not believe it, because an acquaintance with the proprietor that began many years ago had convinced us that he was a gentleman and we knew that no gentleman would attempt to sell liquor in Rainsboro, and farther we were satisfied that his noble Christian wife and amiable daughters would never consent to have their fair name and pure characters smirched by any connection, directly or indirectly, with a business so degrading, but in order that we might be able to deny the report emphatically we called on the gentleman and he assured us in the most positive terms that he had not even thought of engaging in such business.

WOMEN AND MEDICINE.

The reason why a woman is afraid of a doctor is a profound mystery—indeed, it has never been very clearly proven that she is. But some women are constantly in such a nervous irritable condition that the slightest thing annoys and startles them. The cause of this unfortunate state of affairs is usually some functional derangement; some distorting or painful irregularity, some derangement or peculiar weakness incident to her sex; or, it may be due to inflammation, ulceration or displacement of some of the pelvic viscera, or to other organic lesions peculiar to her sex. From whichever cause it may arise, Dr. Pierce's Favorite Prescription is a positive remedy, so certain in its curative results that its manufacturers sell it, through druggists, under a guarantee of giving satisfaction in every case, or money paid for it will be promptly refunded. As a soothing and strengthening service, "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, exhaustion, prostration, hysteria, spasms and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the womb. It induces refreshing sleep and alleviates mental anxiety and despondency.
